I didn't list them, but Echo and those cfpub sites are the ones I was referring to. All others are in the snapshot front end as best bets with the snapshot URL. I didn't realize we didn't own the snapshot help page.

Subject: RE: Best bets for snapshot

We do not own the snapshot-help page, and so I'm not interested particularly in adding links to their list. We would have to get OGC/OPA approval. The list, by the way, is very simply the 4 big items I identified as www3 content that was not included in the snapshot because of its size and content.

the international cooperation pages have a snapshot page –

https://19january2017snapshot.epa.gov/international-cooperation_.html

https://19january2017snapshot.epa.gov/climatechange/international-climate-partnerships_.html

Hey! actually, all of the www.epa.gov pages below are also in the snapshot.

so what's left is echo and those 2 or 3 cfpub sites. I would not best-bet those. We really want search to be contained to the contents of the snapshot. That's its purpose. Folks can go to our www.epa.gov site for current information, and if something should disappear that's not snapshotted, then the FOIA folks will have to deal with that.

Subject: Re: Best bets for snapshot

Best bets have been created for the sites listed below, except those not in snapshot, regardless of what search results look like.

I suggest we add the ones not in snapshot to the list of resources on the snapshot help page.

Hi Judy,

I updated the snapshot best bet URLs to the new URL: <https://19january2017snapshot.epa.gov/> and uploaded it to the snapshot front end. The URLs all end with `_html`. I am now working my way through the list below. Are these exact queries for which you want to see these pages at the top of results?

I'll be captain obvious. When we can test the collection if the results are already at the top we don't need to add the best bet.
